

# The Most Comprehensive Funding Intelligence Solution

- Get pre-award funding intelligence on grant opportunities
- Identify opportunities that are most relevant to you; get alerts on new programs
- Review historical award data to spot trends, as well as identify potential collaborators or competitors

## The Funding Challenge:

Securing research funding: it's a challenge faced by institutions across the nation. With research becoming increasingly interdisciplinary and collaborative, it is critical for researchers and research administrators to have access to reliable research funding information. This need has become even greater as the federal funding environment continues to change and competition for funds is strengthening.

## The Solution: SciVal Funding

The ideal web-based funding intelligence solution would address the following:

- Which funding opportunities are most relevant to me?
- How do I determine whether an opportunity is worth pursuing?
- How do I stay up to date regarding new and emerging funding opportunities?
- Who are the important researchers in a given field?
- What research projects were awarded in the past?
- What publications are related to those awards?

### Find the right funding opportunities

- Easy one-stop access to funding opportunities.
- Search and browse comprehensive, accurate and current funding opportunity content.

### Analyze the funding environment

- Access award data for funding performance measurement, evaluation and strategic planning.
- Learn what publications are linked to certain funding programs.

### Maximize award chances

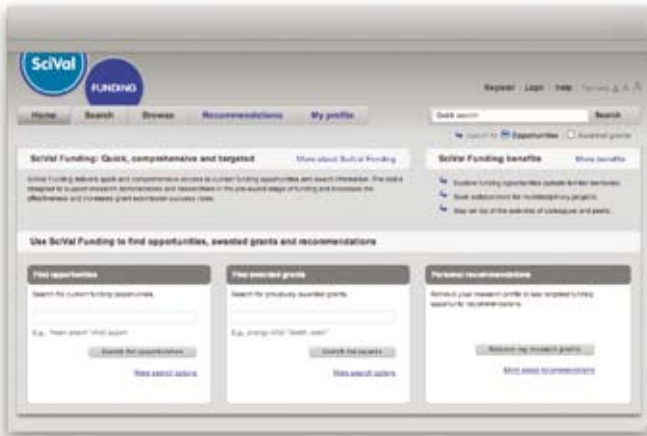

- Receive targeted funding opportunity recommendations and alerts based on pre-populated research profiles.
- Tailor a proposal based on award data and resulting research information.

### SciVal Funding delivers...

- Daily updated funding opportunities from over 5,000 funding sources, including federal and other public sponsors as well as corporate, non profit and international foundations
- Publication data powered by Scopus™ - the largest abstract and citation database of peer-reviewed literature and quality web sources, containing over 16,000 peer-reviewed journals
- Award data linked to opportunities and publication
- Limited submission detection
- Focus on junior-level faculty funding opportunities
- 20 million pre-populated researcher profiles, with publication and affiliation information
- Targeted funding opportunity recommendations based on sophisticated search technology
- Availability to the whole institution via IP access, and allows for remote login

# The SciVal Funding Experience

## ▲ Multiple Search Options

The homepage offers multiple search options for funding opportunities and awards.

## ▲ Personalized Recommendations

View recommended opportunities based on pre-populated research profiles.

## ▲ Historical Award Data

Seamlessly navigate through the funding cycle, from funding opportunities, to awards, to related publications.

Only one in five proposals are accepted in the U.S. and this ratio is even lower for junior researchers. This emphasizes the need to choose wisely based on limited time and resources.
